

ABOUT THE PRINCESS MARGARET

The Princess Margaret combines the clinical excellence of Princess Margaret Hospital with the research expertise of The Campbell Family Cancer Research Institute to deliver novel cancer research, treatments and patient-centered care.

A global leader in the fight against cancer, The Princess Margaret has earned an international reputation for innovation and is one of the top 5 comprehensive cancer research centres in the world.

The new discoveries and innovative cancer therapies that are changing cancer care for patients globally are happening right here in Canada, at The Princess Margaret; where we will CONQUER CANCER IN OUR LIFETIME.

The Princess Margaret is...

the world leader in cancer stem cell research
a world leader in image-guided therapeutics
a world leader in lung cancer research and treatment
a world leader in patient survivorship program development
an emerging leader in breast cancer research and discovery
